La Mer est sur Terre

Centre National de la Mer
Boulogne/Mer-France

Nausicaa, August the 15th, 2017

To Whom It May Concern:

This letter is our recommendation for PANGEA. This company has been providing us for over ten years with artificial rockwork and plants, to our entire satisfaction. The quality of their work and the realism of the landscaping they achieve meet with the standards of quality of world class public aquariums.

Recently we were happy that PANGEA was chosen for the theming of our new facility, including the largest single tank in Europe, to be opened in 2018. From pictures PANGEA managed a realistic 3D representation of a volcanic Island in the Pacific, including all inserts, portholes and access to pipework requested for the maintenance of the life support system.

In such projects, flexibility and creativity are keys to success, and PANGEA showed huge amount of skill particularly in these fields.

We recommend PANGEA, and are looking forward to working again soon with them on new projects.

Sincerely,

Stephane HENARD

General Curator Nausicaa
