Objet : Letter Of Recommendation.

Pangea Rocks has been working together with us on the new extension of the Nausicaa aquarium in Boulogne-sur-Mer, France.

The project contains 3 aquariums with more than 10.000 m³ of water and a total of almost 2000 m² of artificial decoration

Working with Pangea Rocks has been very easy, they have always been very upfront with the situation and helpful, because of their many years of experience in building aquariums we have been able to adjust details to the scope of work and changing in site conditions without any problems.

Pangea Rocks have shown a very high interest in making sure that all work within the aquariums has been of the highest standard, both their own work but also the work of other contractors.

The communication with Pangea was good and they worked well with the other contractor on the building site.

The project was finished on budget and ahead of schedule

We will be happy to recommend Pangea Rocks to any zoo and aquarium that is planning to build a new project, and rest assure that you will not only get a contractor but also a design partner that has a very high knowledge in the field of building artificial decorations for zoo and aquariums.

Best Regards

Alexandre BOUCHEZ
